PROJECTS

[Sep 2020 – Jan 2022] **Pilot Case - Almond breeding for drought resistance**

We are a team of four students working on a breeding project for the development of a new Almond variety that is resistant to drought and salinity. This project evaluated the market needs after intensive market research, we decided on the crop and the traits of interest to improve on, in this case drought and salinity tolerance. Our project also covers the breeding methods used, and our choices of rootstock, our methods of selection, etc. The project lasted for two years.
