

### **EXEMPT RESOLUTION Nº:**

MODIFIES SAG RESOLUTION NO. 2.834 OF 2003 THAT ESTABLISHES PHYTOSANITARY ENTRY REQUIREMENTS FOR SEEDS OF INDUSTRIAL CROP SPECIES.

Santiago, 09/03/2022

#### SEEN:

The provisions of Law No. 18,755, Organic Of the Agricultural and Livestock Service; Law No. 19,880 establishing the basis for the administrative procedures governing the acts of the organs of State administration; Decree Law 3.557 of 1980 on Agricultural Protection, Decree No. 510 of 2016 that enables ports for the import of goods subject to review by the Agricultural and Livestock Service and Decree No. 6 of 2021 appointing the National Director of the Agricultural and Livestock Service, all of the Ministry of Agriculture; Resolution No. 7 of 2019 of the Office of the Comptroller General of the Republic; the International Standards for Phytosanitary Measures of the United Nations International Plant Protection Convention (IPPC) for Food and Agriculture, FAO, promulgated by the Decree No. 144 of 2007 of the Ministry of Foreign Affairs; Resolutions Nos. 1.465 of 1981, 2.834 of 2003, 3.080

of 2003, 3,139 of 2003, 3,815 of 2003, 133 of 2005 and 1,284 of 2021, all of the Agricultural and Livestock Service.

### **INASMUCH:**

- 1. That the Agricultural and Livestock Service, hereinafter SAG, is the national authority in charge of ensuring the phytosanitary and zoosanitary heritage of the country and, under this framework, is empowered to adopt measures to prevent the introduction into the national territory of pests and diseases which may affect animal and plant health, which may arise from imported goods.
- 2. That, by virtue of this power, the SAG issued Resolution No. 2,834 of 2003, which establishes phytosanitary entry requirements for seeds of industrially grown species.
- 3. That the aforementioned resolution establishes phytosanitary import requirements for *Glycine max* (soy) seeds.
- 4. That, in accordance with the guidelines of the International Plant Protection Convention (IPPC) and the provisions of Resolutions No. 3.815 of 2003 and 1.284 of 2021, of this Service, the establishment of requirements Phytosanitary requires a technical justification, so the Pest Risk Analysis (PRA) has been carried out to evaluate the probability of introduction to Chile of *Heterodera glycines* (Tylenchida, Heteroderidae) through soybeans (*Glycine max*), which has allowed updating the phytosanitary requirements for this route.
- 5. That according to the ARP, it is required to manage the riesgo associated with the plague *Heterodera glycines* in shipments of *Glycine max seeds (soy)*," given that there is scientific evidence that this quarantine pest for Chile can be transported through soil present in seeds.

## SOLVE:

1. Amend Resolution No. 2.834 of 2003, which establishes phytosanitary entry requirements for seeds of industrially grown species, to the following:

1.1 Replace in Resolution No. 1 the species "Glycine max (soy)" and its entry requirements and additional declarations that must be specified in the phytosanitary certificate, remaining as follows: form:

SPECIES	ENTRY REQUIREMENT AND ADDITIONAL DECLARATION SPECIFIED IN THE PHYTOSANITARY CERTIFICATE
Glycine max (soy)	The shipment was inspected and is free of soil and <i>Heterodera glycines</i> .  The shipment has been subjected to a disinfection treatment with any of the following fungicidal products or combinations thereof, or others duly qualified: Benomyl, Benomyl + Thiram, Carbendazim, Thiabendazole.  The shipment has been subjected to a fumigation treatment against <i>Bruchidius spp., Callosobruchus analis, Callosobruchus chinensis and Callosobruchus maculatus</i> (Col. Bruchidae), according to the specifications indicated in paragraph 6 of this Resolution.

2. The entry into force of this Resolution shall become effective upon its publication in the Official Journal.
