

Included in this folder

cGMP Training Example – A template of a training program that a production facility can utilize as a template. It is based on the cGMP guidance to the industry. This should be blended with the facility's current practices so it's appropriate to the facility. Facilities may contact PAS with any questions about the content of this presentation or review the final blended training program.

Citations – Lists the articles and resources mentioned in the cover letter and Hazard Analysis.

Cover Letter – General overview

Template Food Safety Plan FSP File – This file is only compatible with the Food Safety Plan Builder Tool that can be downloaded for free here: <https://www.accessdata.fda.gov/scripts/foodSafetyPlanBuilder/>. If used to draft a food safety plan by the facility, each component should be reviewed and adjusted as necessary to match the actual operations.

Example Food Safety Plan – This is a print out of the Template Food Safety Plan FSP File.

Hazard Analysis – Includes the considerations and justifications from PAS as well as a basic risk rubric.

Cited Articles – Copies of articles and literature used for consideration of the Hazard Analysis and cGMP documents.
