

ASTA's grassroots program, Seed Advocate, is designed to enhance member involvement in state and federal legislative processes. Your involvement is a critical component to ensure seed interests are heard and considered by policy makers. No other single influence is greater than your voice to your elected officials - those who make decisions that directly impact your day-to-day business operations.

Your involvement counts. ASTA staff will track issues as they arise and evolve and provide the vehicles you need to stay informed. Then, when action is critical, you will be able to respond appropriately. Preparation will take the form of calling and/or meeting with your officials in their offices and hometowns, conveying positions to your friends and business associates, assisting with elections and fund-raisers and report your activities - all with ASTA guidance and support. There IS strength in numbers - **if we act**.

Survey

Please complete and submit this form to become a Seed Advocate.
